

P·T·I 800-01

Working With Propane

Course Overview

This course is a self-study awareness course for any individual requiring a basic overview about propane, propane systems and the proper, safe way to use propane.

Key Learning Objectives

The student will gain knowledge in the following key areas:

- **Product Knowledge**
Includes instruction on the properties and characteristics of propane; preventative measures and first aid tips specific to propane; sources of ignition and testing for leaks; emergency preparedness.
- **Propane Containers**
Includes instruction on types and sizes of propane cylinders; propane cylinder components; handling and storage of propane cylinders; propane cylinder inspection; proper use of propane cylinders; the transportation of propane cylinders and propane storage tanks.
- **Operating Propane Appliances**
Includes instruction on general use of propane appliances, basic rules for about propane system installations; the use of approved appliances; flame appearance; combustion and ventilation.

Regulatory References

This course has been designed to satisfy regulatory requirements of the most current CAN/CSA-B149.2 Propane Storage and Handling Code and Transportation of Dangerous Goods regulations.

Certification Requirements

The student must complete the included exam and return it to the Propane Training Institute for grading. Students who obtain a grade of at least 75% will be issued a paper wall certificate indicating successful completion of the course. P·T·I certification is valid for three years from the date of training.

Course Duration

This course has been designed as a self-study awareness course, however, could be offered in a classroom setting by a P·T·I certified Trainer.
