

NEW VERSION: 100-01 – PROPANE PUMP ATTENDANT TRAINING

The Propane Training Institute (P•T•I) is pleased to announce that a new version of the 100-01 – Propane Pump Attendant training program is now available in both English and French for sale to P•T•I certified Trainers and Examiners.

The new version number assigned to this update is Version 3.0. The Student Workbook and the Exam will bear the new version number of Version 3.0. Trainers and Examiners may continue to use the previous version of the course until their supplies are exhausted.

Effective immediately, P•T•I will only be shipping Version 3.0 of the course materials. Since the previous version of the Student Workbook and Exam are still acceptable for use, P•T•I will not be accepting returns or requests for exchange.

Version 3.0 of the training course addresses the following key updates including:

- updated photographs throughout the Student Workbook;
- an expanded section on how to read the stamps on propane cylinders with new photographs;
- new information on composite cylinders including specifics on the requalification periods and where the stampings are located;
- the movement of the chapter on how to purge a propane cylinder to the end of the Student Workbook to reflect the status of this chapter as optional;
- the addition of learning objectives at the start of each chapter;
- an updated WHMIS sample reflecting the most recent version available;
- expanded information to clarify the differences between the three TDG exemptions most commonly utilized at retail cylinder filling locations;
- expanded information on emergency evacuation planning;
- the addition of a Glossary of Terms at the end of the Student Workbook; and
- the addition of the requirement for the Trainer/Examiner to sign the bottom of the practical hands-on exam.

Also shipping with Version 3.0 is a new Facilitation Handbook which provides all of the answers to questions asked in the Exercises, instructions for how to prepare for training and the exam process, and an answer key for the written exam. It also includes instructions for using the PowerPoint presentation, which is expected to be made available for purchase in the coming weeks, as discussed below. P•T•I will ship one copy of the Facilitation Handbook with each shipment of the course.

Addition of a PowerPoint Presentation and Updating of the 100-01 DVD

P•T•I will soon be releasing a PowerPoint presentation for sale to P•T•I Trainers for the 100-01 course, along with an updated version of the 100-01 video (on DVD only). Watch for a separate Bulletin on these two products to be released within the next few weeks. The new PowerPoint presentation will assist Trainers in the classroom delivery of the training course and includes embedded clips from the 100-01 DVD.

Changes to the 100-01 DVD are minor and focus on adding navigation tools to allow the student to select individual chapters or play the whole DVD. In addition, we have made some modifications to the TDG section within the DVD to direct the student to review the most current Student Workbook to ensure they receive the most recent updates, since TDG regulation is subject to the most frequent changes.
